English Language Setting in the Information Portal

The Information Portal is becoming more and more international. On this occasion, we would like to point out that you can make a language selection between German and English in the Information Portal.

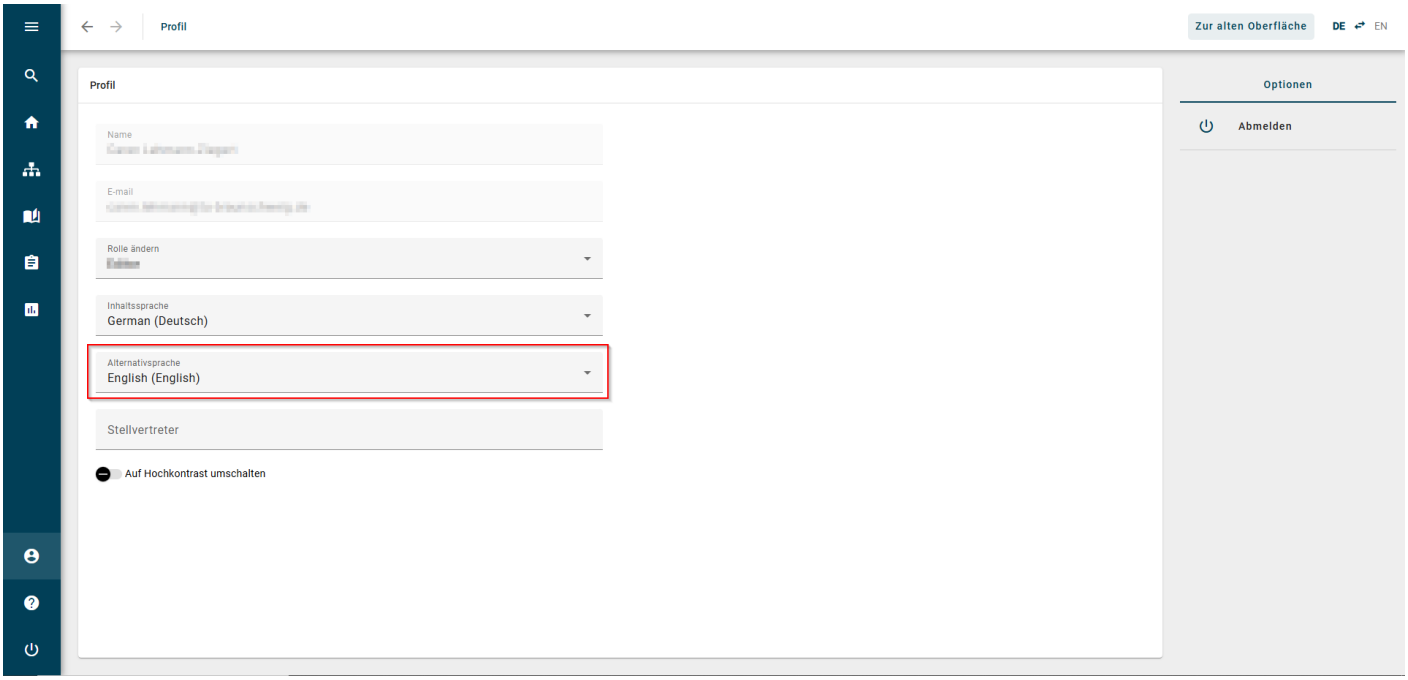

To display English-language forms in the Information Portal, users must switch to the English mode of the user interface.

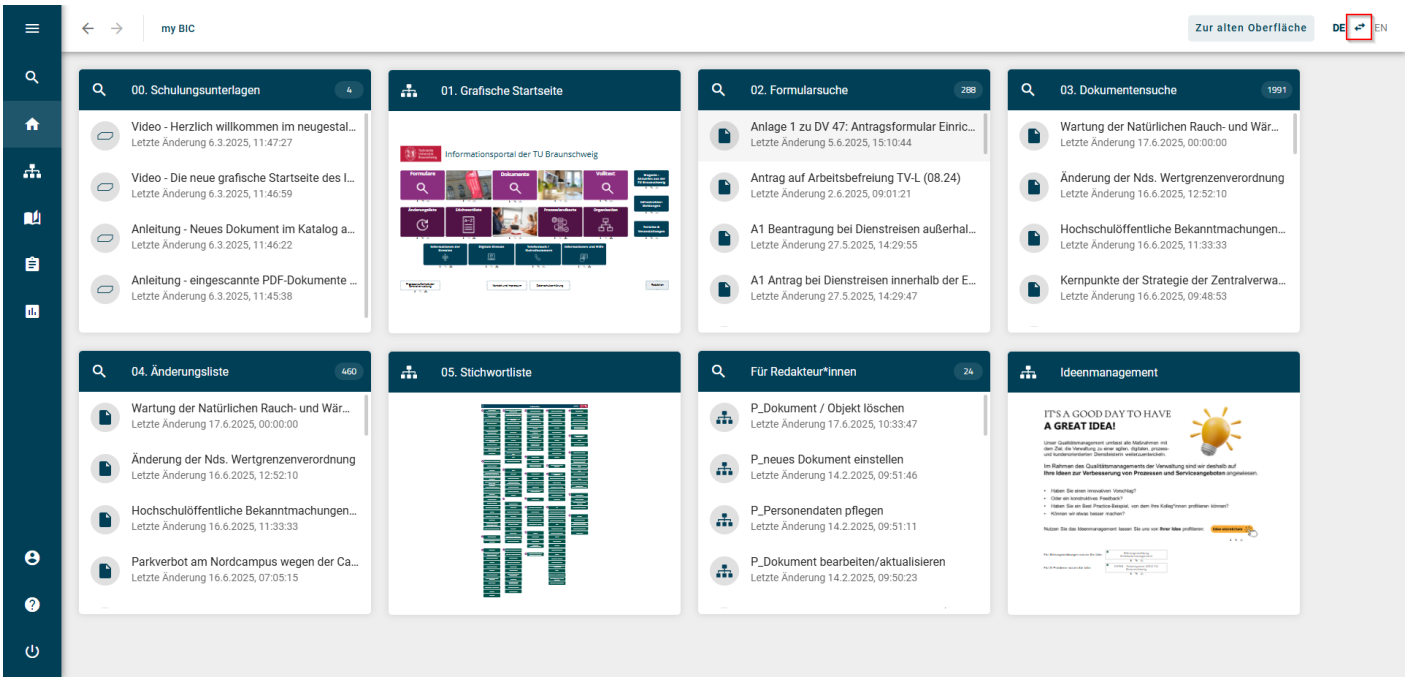

1. Firstly, you need to make the language settings in your profile. To do this, first click on the "Profile" button.

2. Your profile is only displayed in a brief overview. Click on "Vollständiges Profil öffnen (Open full profile)" to display all content.

3. In the menu window that now opens, you can set the "Inhaltssprache (Content language)" and the "Alternativsprache (Alternative language)". You only need to do this once. Please always select "German" for the content language so that the content is displayed correctly. Please select "English" as the alternative language.

4. Once you have made this one-off default setting, you can switch the information portal from German to English and vice versa by clicking on the double arrow in the top right-hand corner.
