

[EN] General Information

Stud.IP is a university-wide teaching and learning platform that has been available to all teachers and students at TU Braunschweig since 2011, making it an important part of academic life.

You can access Stud.IP at <https://studip.tu-braunschweig.de/>.

Here you can log in with your **TUBS ID**, the same ID you use to access other TU Braunschweig services..

All course data for the current semester is automatically imported and synchronized from TUconnect, the university portal. Academic data is also automatically synchronized as soon as it is available in the system.

In addition to managing courses, Stud.IP offers you many other possibilities. For example, teachers can manage their office hours and provide contact information. Students can find and contact fellow students, create study groups, and exchange ideas with the entire university in the global Blubber.

In short: it's worth exploring Stud.IP for yourself and trying out different functions to find out which ones best suit your teaching or studies. If you encounter any problems, don't hesitate to contact Stud.IP support.

To ensure planning security for all user groups, we carry out the Stud.IP update on the last Wednesday in September every year. You can find the exact dates [on our website](#).

Stud.IP Support

Whether you have questions about registration procedures or changing course times, our support team is happy to help with any questions you may have about Stud.IP via email or phone!
